

Press Release

Sauer Compressors at Hannover Messe ComVac 2019

World premiere for Sauer high-pressure series Orkan

Kiel, Germany, 29 January 2019. At this year's ComVac during Hannover Messe (01-05 April 2019, hall 26, booth B41) Sauer Compressors will celebrate the premiere of a design study of the new Orkan high-pressure series. Sauer will also present the new oil-free compressor HAUG.Sirius NanoLoc.

Once again Sauer Compressors will be present at Hannover Messe ComVac. The booth's highlight will be the design study of the brand new Orkan series. It will top up the Breeze series and will include compressors with final pressures of up to 500 barg. Additionally, the series will offer booster solutions with inlet pressures of up to 16 barg as well as gas-tight designs for handling gases such as helium, natural gas and hydrogen.

HAUG.Sirius NanoLoc: oil-free up to 450 barg

The new HAUG.Sirius NanoLoc will be another cornerstone of the trade fair booth. The HAUG solution is the first compressor of its kind that offers a final pressure of up to 450 barg. Like all HAUG compressors, the HAUG.Sirius NanoLoc operates completely oil-free. With its combination of a high final pressure, a hermetic gas-tightness and a wear-free drive via magnetic coupling, the solution is unique in its class and can compress nearly all gases.

The One-Stop-Shop

Trade show visitors will have the opportunity to experience Sauer Compressors' versatile range of accessories. This includes compressor controls as well as solutions for gas and air treatment, storage and distribution. Sauer offers these technologies for medium and high-pressure applications and for wet and dry gases. The large equipment portfolio enables Sauer to provide single-source solutions specially customised to individual requirements. Customers also benefit from short delivery times as well as from perfectly matching components.

Sauer Compressors is a medium-sized German group of companies with twelve international subsidiaries. The company was founded more than 130 years ago, and has over 80 years' experience in compressed air technology. Today, it focusses on the development, production and sale of medium- and high-pressure compressors for applications in the naval marine, commercial shipping, industrial and offshore sectors. Its modern reciprocating compressors for the compression of air and neutral and inert gases reach pressures of 20 to 500 barg. It offers customised solutions for individual customers, OEMs and companies that operate on a global stage. With a global network of agents and representatives, Sauer maintains close proximity to its customers. By enhancing its range of compressors with high-quality accessories, engineering services, installation and service concepts, Sauer can offer end-to-end system solutions, including complete turnkey installations.
